What's "Commons"?

A platform for people to borrow & share

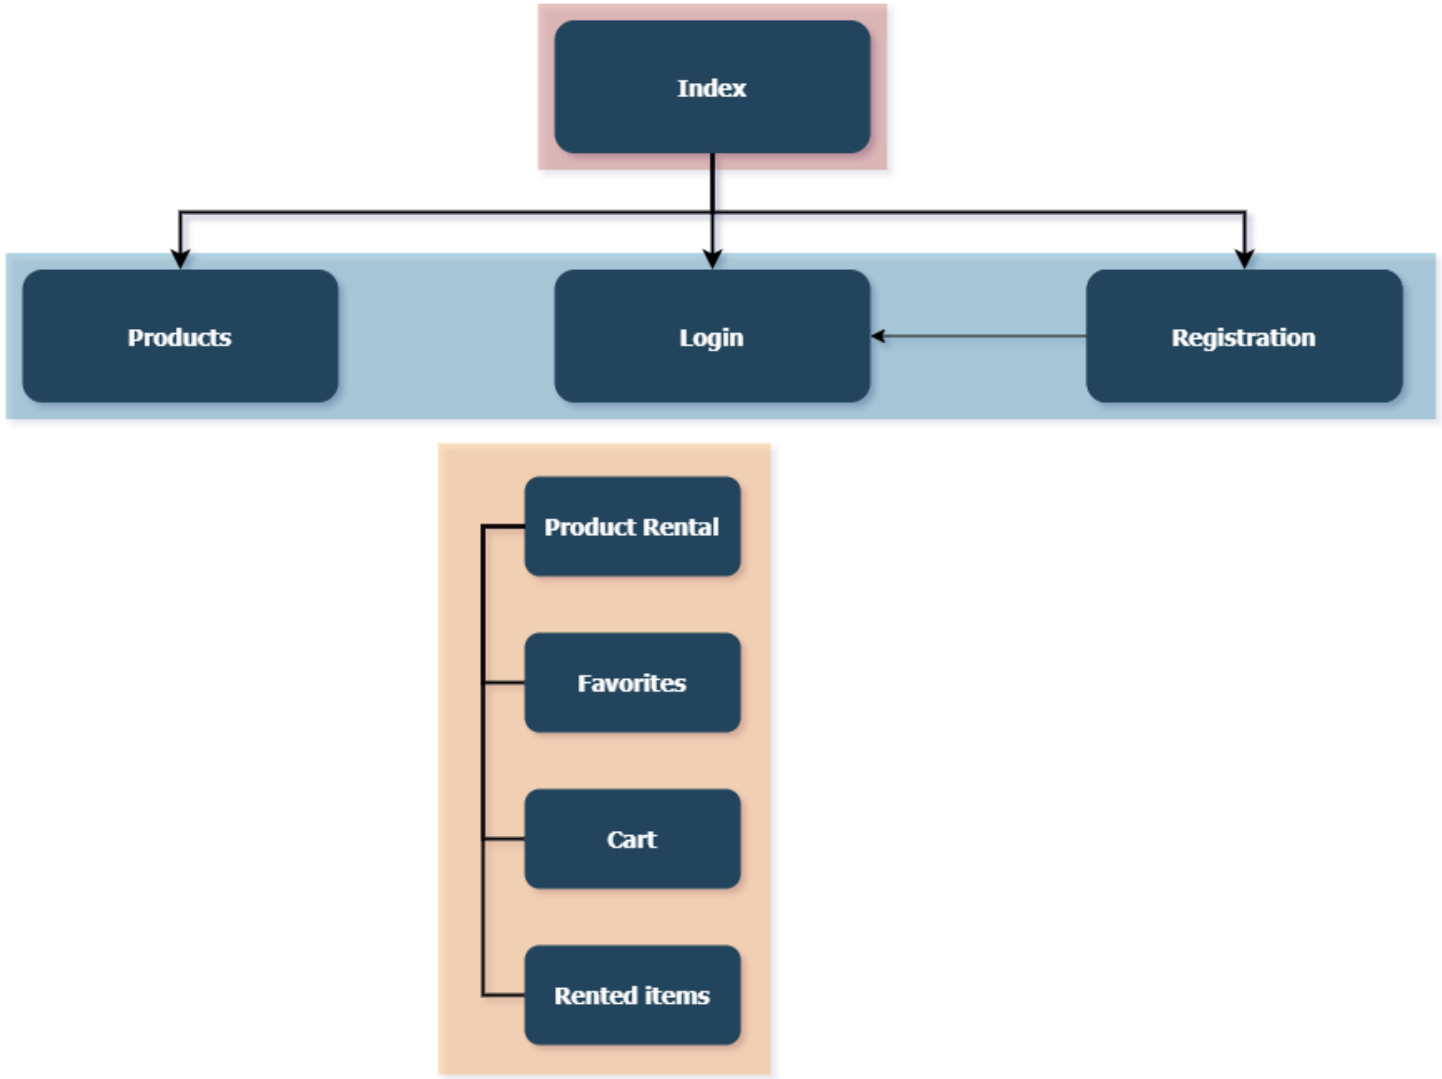
Add your own items for others to borrow,

browse other people's items to borrow

Original Plan

We revised our project to include only the highest priority features in the MVP.

Not all our original features made the cut.



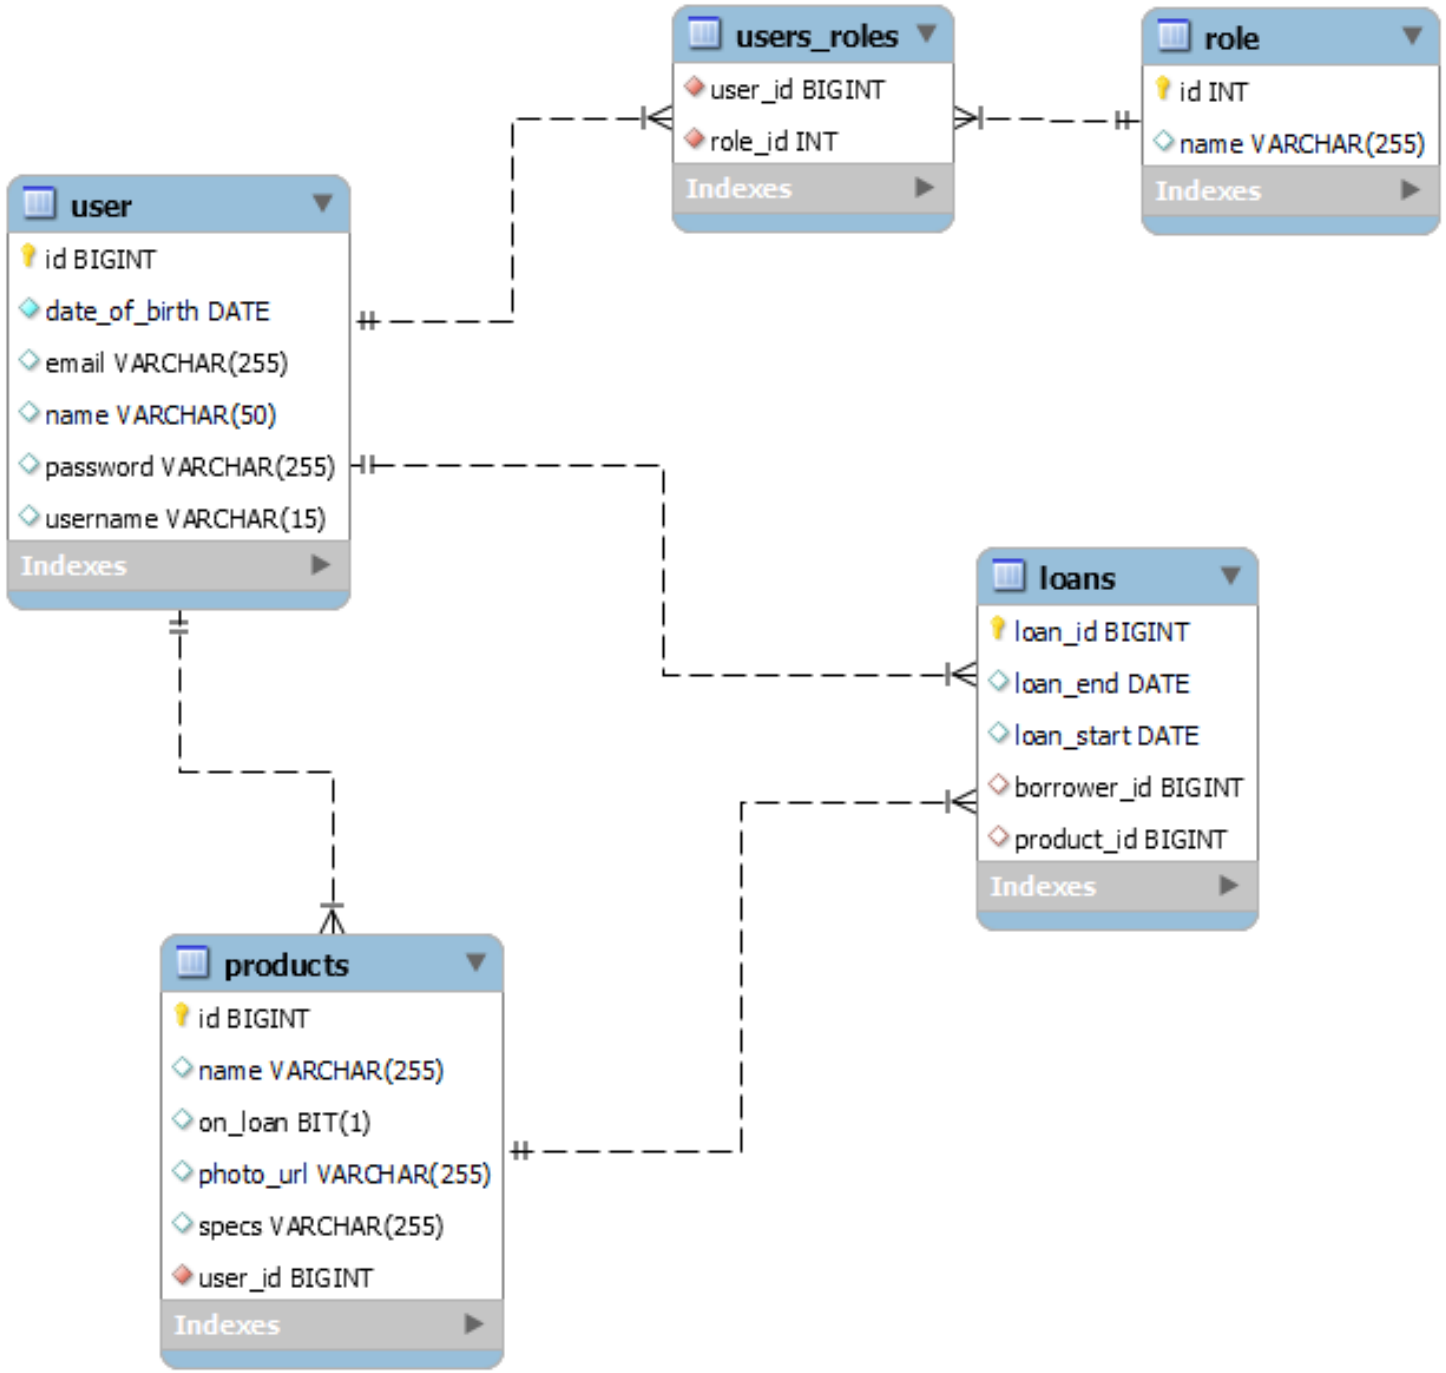
Features

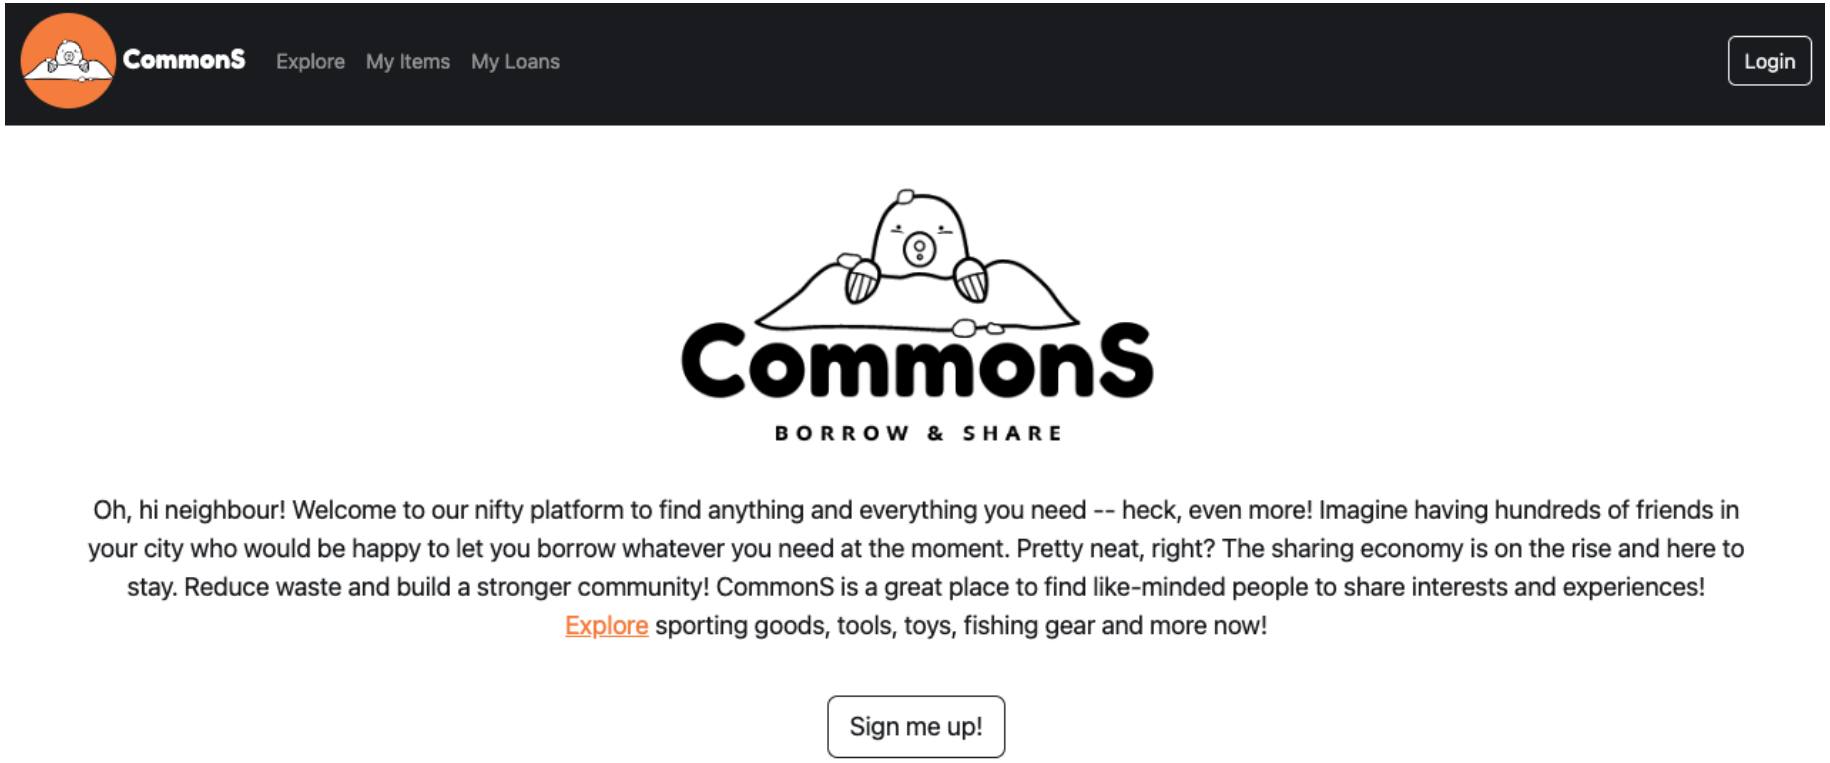
- Sign up to access
- Login/Logout
- Add an item to lend to others
- Borrow an item from someone else
- Explore all items for borrowing

Features (Continued)

- View the items you're lending out
- View your loans
- Remove one of your items
- Mark a borrowed item as returned

Let's talk data





It's DEMO time! 🎉
